

[Foreside Recognized For Outstanding Achievement in Supporting Client Success & For Its Technology, Foreside AdCompliance®](#)

September 22, 2019

Foreside is proud to announce that it has been named a finalist for two industry awards in connection with its compliance services and proprietary technology, Foreside AdCompliance®, that saves clients time and money reviewing advertising materials:

- [WealthManagement.com 2019 Industry Awards](#) in the Compliance/Law Firm Category
- [Fund Intelligence Operations and Services Awards 2019](#) for Best Compliance Advisory Firm

Winners will be announced in September and October respectively.

As a leading provider of governance, risk and compliance solutions, Foreside is committed to designing, building and delivering innovative solutions for clients, including customized, business-focused compliance consulting services, supported by best-in-class technology.

Foreside's newly rebuilt proprietary Ad Review system, Foreside AdCompliance®, provides best-in-class technology to support our consulting clients or as a licensed product for in-house use through a secure SaaS platform. Foreside developed this new proprietary marketing compliance review system using state of the art cloud technology. Foreside AdCompliance® promotes collaboration, evidences principal approval of material and maintains compliant books and records. It is an efficient tool to aid in the review of marketing materials without faxing, emailing, scanning, handwriting, and saving multiple documents offline during the review process. It saves clients time and money. We believe in it so strongly that we use it ourselves.

The advanced capabilities of Foreside AdCompliance® come from our many years of experience owning and operating advertising compliance systems. This system was designed with the user in mind – whether that be marketing departments who create the materials, compliance departments who sign off on the materials or management teams who use the system as a workflow management tool. Foreside AdCompliance® saves time and adds value across an organization as a robust workflow management tool.

To keep up with the dynamic regulatory environment, Foreside recently enhanced the system to make it GDPR compliant and included additional management reporting capabilities. It is an important step in ensuring our clients are operating on the most compliant, and effective systems.
